Phosphorescent Anti-Slip Tape

May 2004

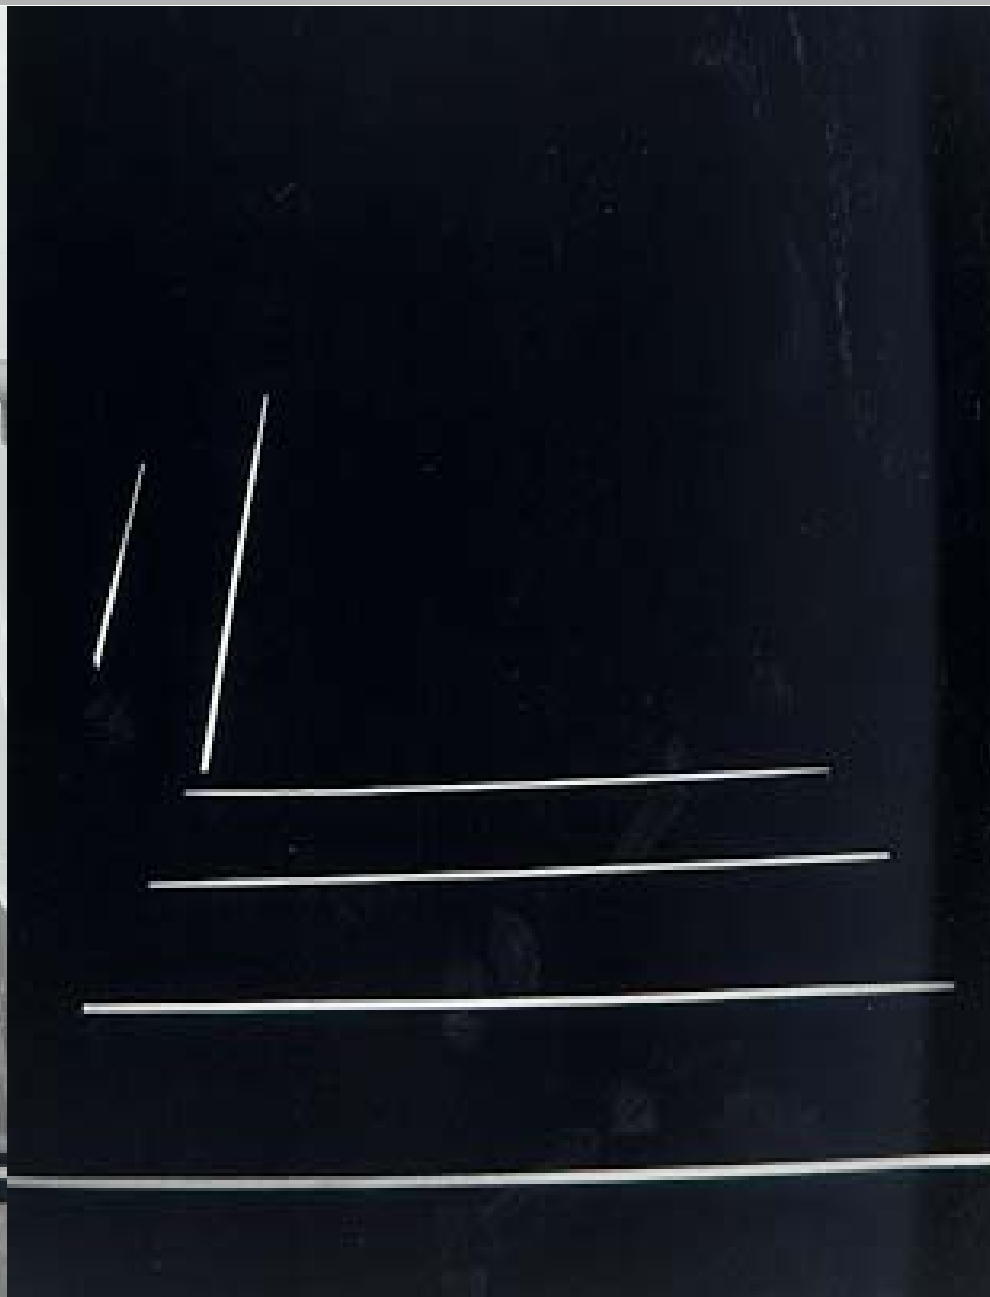

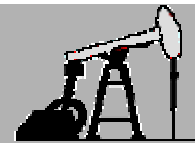

Applications

- Oil Storage Tanks
- Drilling Rigs
- Refineries
- Emergency Exits & Escape Routes
- Work Areas

Global Oil&Gas

Global Oil&Gas

Main Features

Color: Black with luminescent strip

Material: Mineral-coated polyester surface laminated with photoluminescent strip, coated with a rubber based adhesive and covered with a removable protective liner

Size: 55m x 20m (2 in x 60 ft)

Luminescent Strip: 1cm (.40 in)

Special Features

- Glows in the dark
- Meets DIN 67510 requirements
- Slip resistant surface
- Strong & durable
- Resistant to chemicals
- Excellent bond to most dry, clean, smooth surfaces
- Easy to clean
- Easy to install

Special Features

- Provides 6 hours of visibility in dark conditions (depending on time and quantity of previous exposure to light source)
- Enables visualization of exit paths in case of power and other illumination sources outage
- Provides increased safety when lights are out or in places with poor or no night illumination
- Indicated for use in emergency exits, escape routes, tunnels, work areas and any place that requires additional safety
